

HAWKEYE – Thief Hatches Incorporate Industry Leading Technology to offer trouble free reliability with industry leading technology and performance eliminating costly maintenance and potential fines for lowest cost of ownership.

HAWKEYE – PVRV's Pressure, Vacuum Relief Vent for end of line protection on Oil and Condensate Tank Batteries. Incorporates Industry Leading Technology resulting in trouble free reliability and performance and lower cost of ownership.

PIPER / BERNARD – Well Head Electric ESD – Fail Close Spring Return Class 1 Div. 1, 110 VAC Electric Remote and Local Open and Close Options with Gear Over Rides.

TRIAC - Electric Motor Operated Manifold Valves – Available in 110 VAC and 24 VDC Class 1 Div. 1 classification. Options include Modulating Service, Local and remote operation, Manual Over ride. Offered on API 6A and 6D Ball Valves for On / Off Service and 3 way Divert service.

LANCASTER - Automated Well Head Choke – Angle Body in various API 6A Sizes and Pressure ratings. Low Torque design allows for low power 12 or 24 VDC actuators. Features also include ease of repair in line, high range of control and superior trim life in severe service.

PIPER / PALADON - Hydraulic Self Contained Well Head ESD - Requires no external power to actuate. Installed on PIPER API 6A Pressure rated Ball Valves. Typically activated on loss of power to solenoid or hi-low pilot. Must manually pump valve back to open position upon ESD.

E2S - Strobes and Horns – Many options of colors, area classifications, sounds etc.

TEK TROL – Flow Meters and Pressure Transmitters including Coriolis, Orifice Plate, Mag Meter, Vortex as well as Differential Pressure and Pressure Transmitters all in Explosion Proof Area Classifications.

NIVELCO – Level & Temperature Transmitters and Switches. Technologies include Guided Wavelength and Burst Radar, Vibrating Fork all in Explosion Proof Area Classifications.

LANCASTER FLOW AUTOMATION – Cyclonic In Line Style Automated Chokes with superior internals for high flow, hi turn down and superior corrosion resistant internals.

PIPER / DRESSER SURE – Well Head Electric ESD – API 6 A Ball Valve with Fail Close Spring Return Class 1 Div. 1, 110 VAC Electric Remote and Local Open and Close Options with Gear Over Rides.

ARGUS – Pressure Switch for Reliable Artificial Lift Shut Off, Explosion Proof Certified, 20 – 5000 PSI Field Adjustable Range, Proven Reliability and allows for field testing via Isolation valve and test ports.

SUREFIRE – Burner Management Systems for Production Equipment, Combustors, Line Heaters and more. Options include Pilotless Systems with Heat on Demand.
